2009 COMMODITY INSURANCE FACT SHEET

Forage Production

Utah

Crop Insured

- All the alfalfa or alfalfa grass mixture in the county.
- Grown during one or more years after the year of establishment.
- Alfalfa is defined as acreage initially seeded as a pure stand of perennial alfalfa (including alfalfa seeded with a cover crop or nurse crop) that meets certain age and stand requirements.
- Alfalfa grass mixture is defined as acreage initially seeded as a mixture of perennial alfalfa and perennial grasses, meeting the adequate stand and age requirements for alfalfa grass mixture.
- Alfalfa stands that are overage (ninth and succeeding years after year of establishment) or with less than the required amount of plants per square foot are insurable as the alfalfa-grass mixture type as long as there are at least 1.2 living alfalfa plants per square foot. No maximum age limitation applies. See an agent for further details on age and stand requirements.

Causes of Loss

Adverse weather conditions¹
 Failure of irrigation water supply²
 Fire³
 Insects⁴
 Plant disease⁴
 Wildlife⁵

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture. ²If caused by an insured peril during the insurance period. ³Unless weeds and undergrowth are not controlled or unmulched pruning debris is not removed. ⁴But not damage due to insufficient or improper application of control measures. ⁵Unless wildlife control measures have not been taken.

Important Dates

Sales Closing October 31
 Acreage Report Due March 1

Counties Available

Beaver Box Elder Cache Davis Duchesne
 Iron Juab Millard Morgan Salt Lake
 San Juan Sanpete Sevier Tooele Uintah
 Utah Weber

Crop may be insurable in other counties by written agreement if specific criteria are met. Contact an agent for more details.

Insurance Period

Insurance attaches on acreage with an adequate stand on the later of the date we accept your application or
Spring Seeded April 15
Fall Seeded and Established Stand October 16

Insurance ends the earliest of:

- total destruction,
- removal from the windrow or the field for each cutting,
- final adjustment of a loss,
- the date grazing commences on the forage crop,
- abandonment of the forage crop or
- October 15

Coverage Levels and Premium Subsidies

The forage production guarantee is an individual amount of annual production measured in tons of air dried alfalfa or alfalfa grass depending on the type. An individual guarantee is based on the grower's past production. Prospective insured's are asked to provide their insurance agent 4 to 10 years of production and planting history that is used to determine their average yield per acre. Producers can choose coverage levels ranging from 50 to 75 percent of their individual approved average yield and 55 to 100 percent of a price selection announced by USDA. Catastrophic risk protection (CAT) coverage guarantees 50 percent of their approved average yield will be valued at 55 percent of the announced price.

Price Election Price used to calculate your premium and indemnity:

Alfalfa: \$118.00 per ton

Alfalfa-Grass Mixture: \$118.00 per ton

Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$300 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent.

Loss Example

A claim can be filed whenever production falls short of the guarantee selected by the insured. The amount of a loss is determined by multiplying the production shortfall by the pre-selected price.

Based on actual production history (APH) yield of 6 tons per acre, 65-percent coverage level on 100 acres of forage, selected price of \$118 per ton, irrigated, and one basic unit, 100-percent share.

6	Tons per acre average yield (APH)
x .65	Coverage level
3.9	Tons per acre guarantee
- 1	Tons per acre actually produced
2.9	Tons per acre loss
x \$ 118	Price election
\$ 342	Gross indemnity per acre

Where to Purchase Crop Insurance

All multi-peril crop insurance, including CAT coverage insurance policies, are available from private insurance agents. A list of crop insurance agents is available on the RMA Web site at:
