Crop Insured
The crop insured will be all the storage and non-storage onions (excluding green (bunch) or seed onions, chives, garlic, leeks, and scallions) in the county for which you have a share:
- Onions must not be planted on acreage which was planted to dry (bulb) onions, green (bunch) onions, seed onions, chives, garlic, leek or scallions the previous crop year unless otherwise designated by the corporation.

Counties Available
Onions are insurable in Box Elder, Davis and Weber counties. Crop in other counties may be insurable by written agreement if specific criteria are met. Contact an agent for more details.

Causes of Loss
Adverse weather conditions¹
Failure of irrigation water supply²
Fire³
Insects⁴
Plant disease⁴
Wildlife⁵

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture.
²If caused by an insured peril during the insurance period.
³Unless weeds and undergrowth are not controlled or unmulched pruning debris is not removed.
⁴But not damage due to insufficient or improper application of control measures.
⁵Unless wildlife control measures have not been taken.

Insurance Period
The insurance period ends the earliest of:
- Removal of the onions from the field
- Fourteen days after lifting or digging
- August 31 for all non-storage onions
- October 15 for all storage onions

Important Dates
Sales Closing .................................. February 1
Final Planting ...................................... April 20
Acreage Report Due ................................. June 30

Coverage Levels and Premium Subsidies
Individual amounts of insurance are based on the grower’s past production and planted acres. Prospective insured are asked to provide 4 to 10 years of actual yield history, for which their average yield is calculated. In the absence of four years of actual yield history, the average yield is calculated using a combination of actual and transitional yields (estimate of county average). Producers can select a coverage level ranging from 50 to 75 percent of their individual approved yield and 50 to 100 percent of the price announced by USDA. Catastrophic Risk Protection (CAT) coverage is equal to 50 percent of their approved average yield and 55 percent of their price. The unit of measure used is hundredweight (cwt.).

Price Election
Price used to calculate your liability and indemnity.

2010 Price $5.50 per cwt.

Cost of Crop Insurance
The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of $300 with 100 percent of the premiums being subsidized. Higher coverage levels pay an application fee of $30 and premiums are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent or your local county FSA office for an agent listing.

This fact sheet gives only a general overview of the crop insurance program and is not a complete policy. For further information and an evaluation of your risk management needs, contact a crop insurance agent.
**Loss Example**
Example assumes 75-percent coverage, and 100-percent price election of $5.50 cwt and an approved yield of 320 cwt per acre and 100-percent share.
